In the Claims

This listing of claims will replace all prior versions, and listing, of claims in the application:

1. (Currently Amended): A method for tracking analytical information acquired during consumer transactions, comprising the steps of:

conducting a commercial transaction between a customer and a vendor;

creating a record of each of the transactions conducted between the customer and the

5 vendor;

storing the created record of the commercial transaction in a vendor transaction database;

retrieving the created record from the vendor transaction database;

retrieving from an enhancing database information relating to information retrieved from the vendor transaction database;

10 ~~storing the combination of operating on the retrieved records from the vendor transaction database and the retrieved information from the enhancing database in accordance with a predetermined algorithm that will summarize the operated on data and information as aggregate data;~~

~~storing the aggregate as aggregate data in an aggregate database in a relational manner;~~

and

15 performing an analysis ~~a query~~ on the aggregate data stored in the aggregate database in accordance with a predetermined analytical algorithm to provide an analytical ~~a query~~ result.

2. (Original): The method of Claim 1, and further comprising the step of accessing the analytical result and displaying such accessed analytical result.

3. (Original): The method of Claim 1, and further comprising the step of modifying the predetermined analytical algorithm.

4. (Original): The method of Claim 1, wherein there are provided a plurality of records stored in the vendor transaction database.

AMENDMENT AND RESPONSE

S/N 09/748,074

Att. Dkt. No. EXEM-25,499

3.

5. (Original): The method of Claim 4, wherein the step of retrieving comprises the step of retrieving a plurality of records from the vendor transaction database.

6. (Original): The method of Claim 5, wherein the step of retrieving operates in response to receiving a request for one or more of the stored records in the vendor transaction database.

7. (Original): The method of Claim 6, wherein the request comprises a fixed number of records.

8. (Original): The method of Claim 6, wherein the request comprises a time range of records.

9. (Original): The method of Claim 8, wherein the request comprises a date range of records.

10. (Currently Amended): The method of Claim 6 and further comprising the step of modifying the request as a function of the number of commercial transactions being conducted.

11. (Original): The method of Claim 5, wherein the step of retrieving operates in response to the creation of one or more of the records in accordance with predetermined criteria.

12. (Original): The method of Claim 11, wherein the predetermined criteria comprises the receipt of a fixed number of records since the last retrieval step.

13. (Original): The method of Claim 11, wherein the predetermined criteria comprises time criteria such that records are retrieved after a predetermined amount of time from a last retrieval operation.

AMENDMENT AND RESPONSE

S/N 09/748,074

Atty. Dkt. No. EXEM-25,499

4

14. (Original): The method of Claim 11, wherein the predetermined criteria comprises date criteria such that the step of retrieving operates in accordance with predetermined dates.

15. (Original): The method of Claim 11, wherein each record is retrieved upon creation thereof.

16. (Currently Amended): The method of Claim 1, wherein the predetermined analytical algorithm comprises a statistical analysis algorithm and wherein the step of operating on performing the analysis comprises statistically analyzing the aggregate data and information.

17. (Currently Amended): A method for analyzing transaction information in association with a plurality of commercial transactions between a plurality of customers and a vendor, comprising the steps of:

5 creating a transaction database of the commercial transactions between the plurality of customers and the vendor, which transaction database includes information relating to the transactions and the associated customers;

extracting a select portion of the transaction database and creating an intermediate aggregate database including information relating to the transactions and the associated customers;

10 interfacing with an enhancing database having demographic contained therein that is associated with the customers in the intermediate aggregate database;

extracting demographic information from the enhancing database corresponding to a select portion of the intermediate aggregate database for addition thereto that defines an updated and enhanced ~~a new and aggregate~~ database; and

15 performing a statistical analysis on the aggregate enhanced database in accordance with a predetermined statistical analysis algorithm to provide an aggregate database of an statistical result: statistical results.

18. (Original): The method of Claim 17, and further comprising the step of accessing the statistical result and displaying such accessed statistical result.

5

19. (Original): The method of Claim 17, and further comprising the step of modifying the predetermined statistical analysis algorithm.

20. (Original): The method of Claim 17, wherein there are provided a plurality of records stored in the transaction database.

21. (Original): The method of Claim 20, wherein the step of extracting a select portion of the transaction database comprises the step of retrieving a plurality of records from the transaction database.

22. (Original): The method of Claim 21, wherein the step of retrieving operates in response to receiving a request for one or more of the stored records in the transaction database.

23. (Original): The method of Claim 22, wherein the request comprises a fixed number of records.

24. (Original): The method of Claim 22, wherein the request comprises a time range of records.

25. (Original): The method of Claim 24, wherein the request comprises a date range of records.

26. (Currently Amended): The method of Claim 22, and further comprising the step a step of modifying the request as a function of the number of commercial transactions being conducted.

27. (Original): The method of Claim 20, wherein the step of retrieving operates in response to the creation of one or more of the records in accordance with predetermined criteria.

AMENDMENT AND RESPONSE
S/N 09/748,074
Att. Dkt. No. EXEM-25,499

28. (Original): The method of Claim 27, wherein the predetermined criteria comprises the receipt of a fixed number of records since the last extraction step.

29. (Original): The method of Claim 27, wherein the predetermined criteria comprises time criteria such that records are extracted after a predetermined amount of time from a last extraction operation.

30. (Original): The method of Claim 27, wherein the predetermined criteria comprises date criteria such that the step of extracting operates in accordance with predetermined dates.

31. (Original): The method of Claim 27, wherein each record is extracted upon creation thereof.

32. (Currently Amended): A method for tracking analytical information acquired during commercial transactions between a plurality of customers and a vendor, which vendor is operable to create a record of each of the transactions conducted between the customer and the vendor and store the created record of the commercial transaction in a vendor transaction database, comprising the steps of:

5 retrieving the created record from the vendor transaction database;

retrieving from an enhancing database information relating to information retrieved from the vendor transaction database;

storing the combination of the retrieved records from the vendor transaction database and the retrieved information from the enhancing database in an intermediate database;

10 operation on the data in the intermediate database to provide aggregate statistics of the data in the intermediate database as aggregate data in an aggregate database in a relational manner; and

performing an analysis a query on the aggregate data stored in the aggregate database in accordance with a predetermined analytical algorithm to provide an analytical result.

33. (Original): The method of Claim 32, and further comprising the step of accessing the analytical result and displaying such accessed analytical result.

AMENDMENT AND RESPONSE

Atty. Dkt. No. EXEM-25,499

34. (Original): The method of Claim 32, and further comprising the step of modifying the predetermined analytical algorithm.

35. (Original): The method of Claim 32, wherein there are provided a plurality of records stored in the vendor transaction database.

36. (Original): The method of Claim 35, wherein the step of retrieving the created record from the vendor transaction database comprises the step of retrieving a plurality of records from the vendor transaction database.

37. (Original): The method of Claim 36, wherein the step of retrieving the created record from the vendor transaction database operates in response to receiving a request for one or more of the stored records in the vendor transaction database.

38. (Original): The method of Claim 37, wherein the request comprises a fixed number of records.

39. (Original): The method of Claim 37, wherein the request comprises a time range of records.

40. (Original): The method of Claim 39, wherein the request comprises a date range of records.

41. (Currently Amended): The method of Claim 37 and further comprising ~~the step a step~~ of modifying the request as a function of the number of commercial transactions being conducted.

42. (Original): The method of Claim 36, wherein the step of retrieving the created record from the vendor transaction database operates in response to the creation of one or more of the records in accordance with predetermined criteria.
